

TPRM Executive Analysis

Highly Confidential - Automated AI Assessment

Portfolio Overview

Total Vendors Assessed: 2

Critical Vulnerabilities: 1

Acme Cloud Services

CRITICAL RISK

Context & Scope

Acme handles customer PII with weak controls.
Cloud-hosted CRM platform storing customer PII and payment metadata.

Critical Findings

- No MFA enforced on admin accounts
- TLS 1.0 still enabled
- No documented incident response plan

Remediation Next Steps

- Enforce MFA org-wide within 30 days
- Disable legacy TLS versions
- Draft and test an IR plan

TPRM LEADERSHIP POSTSCRIPT

Acme presents critical residual risk given PII exposure combined with weak authentication controls. Recommend conditional approval pending MFA remediation within 30 days, with a follow-up audit scheduled for Q1.

BetaSoft Analytics

LOW RISK

Context & Scope

Mature vendor with strong controls.
Analytics dashboard, no PII access.

Critical Findings

- Minor: SPF record missing for subdomain

Remediation Next Steps

- Add SPF record

TPRM LEADERSHIP POSTSCRIPT

Low residual risk. Recommend full approval.
